Ad de Jongh. Professor anxiety and behaviour disorders. ACTA/University of Amsterdam

Date May 2006, Friday 5th and Saturday 6th

Venue University Hospital St. Jozef. Leuvensesteenweg 517 Kortenberg (near Brussels)

Summary Attachment is a current issue, particularly due to the increased risks to develop stress related disorders and PTSD (posttraumatic stress disorders) in attachment disorders. With hypnosis early life experiences can be corrected. You learn which place hypnosis and EMDR have in trauma treatment. A link will be made between (dental) trauma and attachment.

Participants Psychiatrists, psychologists, physicians, dentists

Language Dutch / English

Subscription 1 or 2 days

Accreditation is asked for physicians, psychiatrists and dentists.
